

Rass Biosolution Pvt. Ltd. Case Studies

Case Study 1 – Private Label Gummies

Challenge: A wellness brand needed premium gummies with a fast turnaround and custom formulation.

Solution: Rass Biosolution developed a customized formula and managed manufacturing, packaging, and quality testing under one roof.

Result: Successfully launched within the agreed timeline with consistent product quality and regulatory-compliant documentation.

Case Study 2 – Export Manufacturing

Challenge: An international client required nutraceutical products that complied with export quality standards.

Solution: We manufactured products supported by COA, MSDS, microbiological testing, heavy metal analysis, and complete export documentation.

Result: Products were shipped successfully, meeting the client's quality and compliance requirements.

Case Study 3 – Custom Formulation

Challenge: A brand wanted a unique supplement formulation that stood out in the market.

Solution: Our R&D; team developed a customized formula, optimized taste and stability, and validated product quality through laboratory testing.

Result: A market-ready product with reliable quality and consistent batch performance.
